

Fortinet and Dimension Data

Dimension Data has over 25 years experience in planning, building and managing large complex IT infrastructures, and in partnership with Fortinet, we provide integrated security solutions that protect networks against today's constantly changing threats.

About Fortinet:

Headquartered in Sunnyvale, California, with customer support, development and sales facilities throughout North America, Europe, Africa and Asia, Fortinet is the leading provider of an innovative Unified Threat Management (UTM) platform that incorporates essential security applications and services to enable safe and clean communication environments.

Fortinet's products enable organisations to:

- ▲ Protect mission-critical infrastructure from a wide range of attacks
- ▲ Reduce the complexity of security infrastructure and solutions
- ▲ Limit or reduce costs associated with point product implementations and maintenance
- ▲ Keep up with evolving intrusion and virus threats
- ▲ Provide superior multi-threat protection without degrading network performance

Fortinet is a global vendor with

- ▲ 350,000+ FortiGate devices shipped worldwide
- ▲ 18 patents; 80+ pending
- ▲ Leader position in Gartner's "2H07 Enterprise Firewall Magic Quadrant"

Fortinet's solutions have won multiple awards around the world and are the only security products that are certified seven times over by ICSA Labs (Firewall, AV, IPS, IPSec VPN, SSL VPN, Anti-Spam).

About Dimension Data

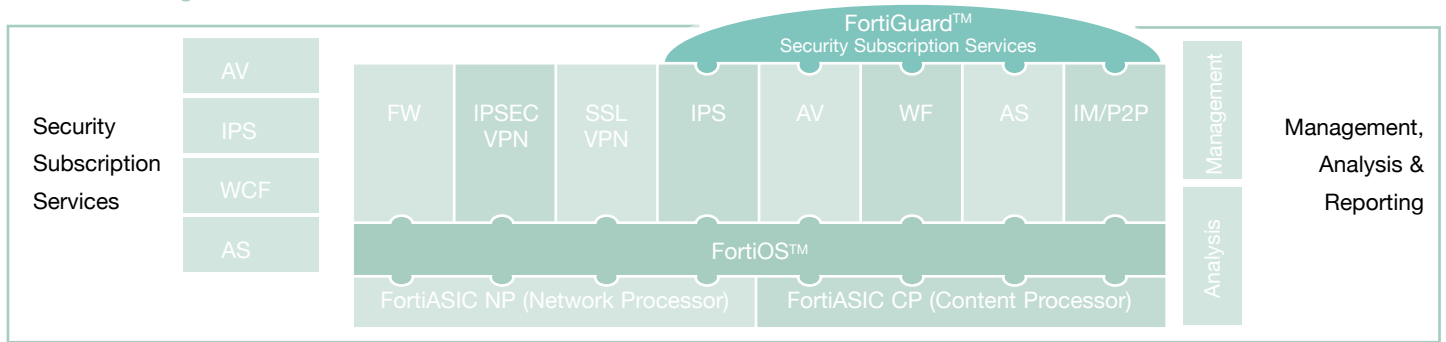

Dimension Data has more than 12 years experience in the global security solutions market and employ in excess of 350 security experts around the world. We consult with organisations and deploy a wide range of security offerings from key vendor partners in all of the 45+ countries where we are present. To date, we have completed in excess of 10 000 product implementations for more than 5 000 clients spanning a multitude of industry sectors.

Dimension Data is a global systems integrator with

- ▲ The highest level of partner status with Fortinet across 5 continents
- ▲ Extensive technical and sales certifications throughout all regions
- ▲ The expertise to support organisations with services and products across the full portfolio of Fortinet offerings

74% of the Global Fortune 100 and 54% of the Global Fortune 500 companies are Dimension Data clients. Together, Dimension Data and Fortinet have provided security solutions to a wide range of organisations - from a leading multinational service provider in Africa to major financial institutions across North America and Asia.

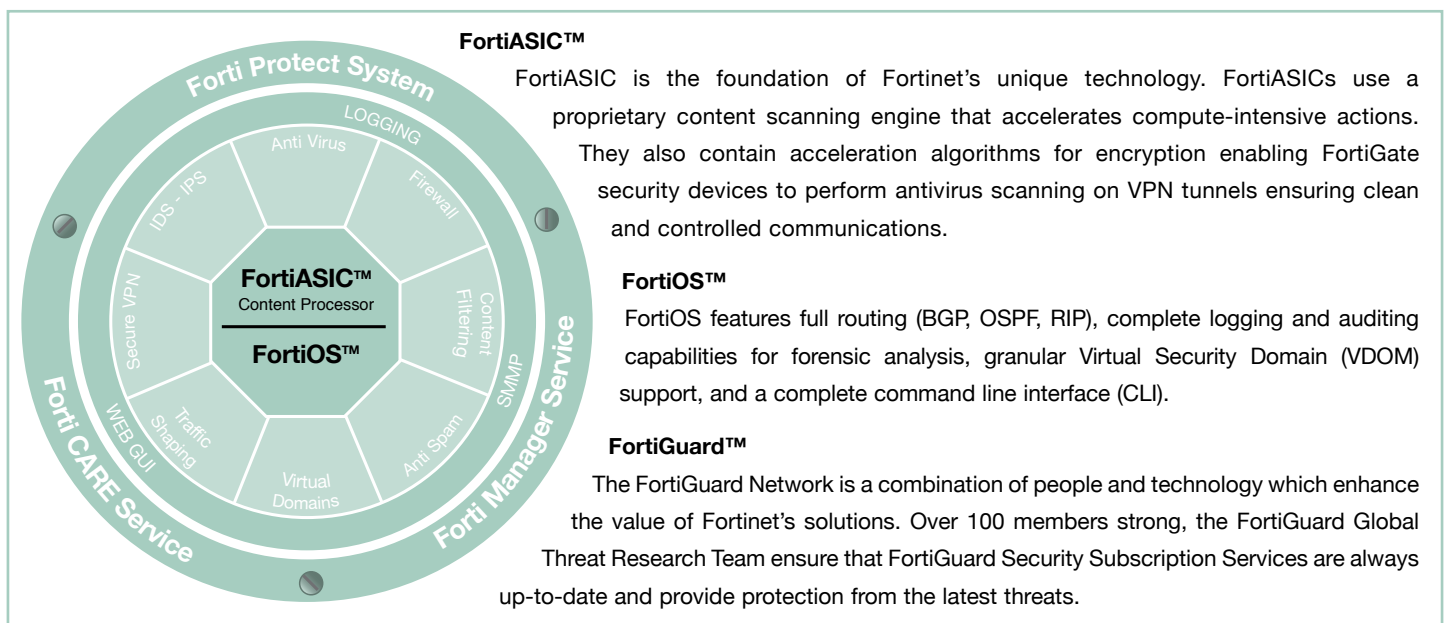

Fortinet offerings

The FortiGate family of integrated security appliances range in performance and physical features to meet network requirements of all sizes and topologies. Additionally, Fortinet delivers a complete line of product extensions that enable network managers to control, monitor, and operate networks simply and powerfully:

- ▲ **FortiAnalyzer™**—Centralised logging and reporting that securely aggregates and analyses log data from multiple Fortinet products
- ▲ **FortiManager™**—Centralised command and control, configuration management and monitoring solution
- ▲ **FortiMail™**—An enterprise-class family of specialised email security solutions providing antispam and antivirus protection

Fortinet's real-time network protection solutions include a range of high-end chassis based systems, appliance-based solutions, and management and reporting tools. These capabilities deliver flexibility in deployment and allow organisations to cost-effectively protect their critical assets.

Installation, Integration and Support

Our extensive experience and Fortinet Technical Professional Certifications, mean that organisations that engage with Dimension Data to plan and build infrastructures that incorporate solutions from Fortinet can be confident that these implementations will meet business requirements and create the foundation for a secure infrastructure. The Fortinet and Dimension Data worldwide partnership offers customers a consistent level of service and support in countries around the globe. Dimension Data pro-actively monitors and maintains security devices through our 5 Global Service Centres using our ITIL aligned Global Services Operating Architecture (GSOA). Service capabilities include 24x7 technical support, product education, and professional integration services.

Dimension Data's Secure Infrastructure

We create adaptable Secure Infrastructures across networks, perimeters, endpoints, applications and data through combinations of people, processes and market leading technology from key partners like Fortinet. Fortinet has built its comprehensive security platform from the ground up to provide multiple layers of threat protection and management and this also translates into increased deployment flexibility and solutions that can scale with business requirements. Together with Dimension Data's global footprint and expertise in services, this means that organisations around the globe can rely on Dimension Data and Fortinet for innovative and cost effective security solutions.
