Bongani Rainmaker Logistics

An innovative Procurement, Warehousing and Distribution solution hosted on Azure

Client profile

Bongani Rainmaker Logistics are a tech-focused logistics company at their core.

Established in 2001, the company has a diverse spread of service offerings provide flexible, tailor-made project logistics solutions to NGOs, the public and private sector.

'Today, the Logistics company's crucial role in the entire process from requisition, to acquisition, delivery, and retaining of learning materials, has been driven and enabled by a significant digital transformation that has taken place.'

Vision

The company required a solution that would facilitate acquisition and distribution of textbooks and tablets to schools, on behalf of two governmental education departments.

This was key to learners receiving their textbooks and for schools to have the ability to provide individualized learning to children through the tablets. It was necessary to create an efficient and functioning digital platform to manage the process throughout the year so that education materials would get to learners on time.

Transformation

Dimension Data designed, developed and deployed a tailored solution to facilitate the acquisition and distribution of textbooks.

The solution was built in a cloud first approach and hosted on the Microsoft Azure platform utilizing native SaaS services.

Results

Today, the Logistics company's crucial role in the entire process from requisition, to acquisition, delivery, and retaining of learning materials, has been driven and enabled by a significant digital transformation that has taken place. This is indicated by the Logistics company's current business state as an information-led enterprise, and not a business solely reliant on logistics.
