Lack of visibility and control in public cloud

Cloud security is complex, yet the end game is about control and visibility. Without it, gaining a complete picture of digital risk is very hard, which is important when considering the appropriate set of technology, tools and controls needed to remain secure.

2021 Hybrid Cloud Report

The complexity of compliance

- 95.2% struggle to keep up with compliance obligations.
- 94.7% ensure the CISO/CSLE security team is involved in cloud decision-making.
- 61.6% say security and compliance are “critical”, and the first consideration in vendor or service provider selection for hybrid cloud planning.
- 52.7% strongly agree on the need to engage with consulting or professional service experts to ensure their hybrid cloud solution meets compliance standards.

Barriers and migrations

Security and compliance are significant influencing factors in the hybrid cloud selection process. This is because building and managing a comprehensive cloud security program is complex and can act as a significant barrier, which is why the skills of service providers are so sought after.

- 46.3% of organizations have migrated at least once or plan to in the next 12 months.
- 29.2% of those who migrated from public cloud to a non-cloud environment.
- 43.2% of those who migrated to a public cloud environment.
- 26.6% of those who have migrated from public cloud cite a security breach as the primary driver for migration to private or non-cloud environments.
- 46.3% of organizations look for risk and compliance services from their partner to support hybrid cloud plans.

Six steps to success

Recommendations for your business

Modernize your applications

Optimize next-gen infrastructure

Establish security as an enabler

Optimize cloud networking

Transform WAN and connectivity for greater agility

Partner for private cloud and platform requirements
