

Network modernisation

# Optimise cloud networking

Agile and secure hybrid cloud networks

## Optimise networking in, to, and across hybrid cloud environments.

A set of **network solutions and services** that form the foundation for cloud, and enable workloads and applications **to perform at their peak**, providing users with the **best possible user experience** irrespective of where they're connecting from or where the application resides.

### Benefits of a high-performing network form the foundation for an optimised cloud

Enable workloads and applications to perform at their peak

Provide employees and customers with exceptional digital experiences

Embedded security across hybrid infrastructure

A network that enables, supports, and scales with your hybrid cloud ambitions

On-demand flexibility, artificial intelligence, and automation provided through software-defined and virtual network services to drive business agility

Operational consistency brings hybrid infrastructure together into a cohesive whole to deliver for business

## Why choose Dimension Data and NTT for cloud networking?

**Leader** in the 2021 Gartner **Magic Quadrant for Network Services, Global\***

**Scored highest** in Gartner's 2021 **Critical Capabilities for Network Services, Global\***

**Leader** in the IDC **Marketscape: Worldwide Network Consulting Services 2019 Vendor Assessment\*\***
