'We were impressed by the fact that they approach solutions from the perspective of giving the business what it wants rather than forcing the business to fit itself into what technology can do'

Monique Perreira, Group Accountant: McDonald's

Why McDonald's wanted to focus on its employees

Internal disciplines such as human resources often receive less attention, frequently remaining paper based and inefficient. There was a tendency to believe that automation and integration of diverse activities such as training, leave, time and talent management and payroll were difficult, if not impossible.

How SAP HCM (Human Capital Management) helped position McDonald's for growth

A consultative approach was followed internally, ensuring that everyone agreed on what the company needed from the solution, what end users needed and what had to be done to make the implementation of the desired outcomes happen as smoothly as possible.

case study

'In 2015, we celebrated 20 years of operations. With the new HCM capabilities we now have, we're superbly positioned to grow and continue enhancing operations for the next 20 years'

Krushan Reddy, Compensation and Benefits Manager: McDonald's

Why McDonald's wanted to focus on its employees

McDonald's opened its first restaurant in South Africa in November 1995. Today, they operate over 200 restaurants in nine of South Africa's provinces.

McDonald's acquired a human resources system that did not include the whole spectrum of HCM activities and did not integrate easily with its SAP financial system.

A lack of integration and automation created multiple challenges. Many critical HCM processes were still manual, creating silos of information and the risk of information being lost.

How SAP HCM (Human Capital Management) helped position McDonald's for growth

McDonald's is renowned for its training throughout the world. They have trained and employed over 10 000 South Africans at various levels, including franchisees, restaurant managers and crew.

McDonald's chose to implement SAP HCM. An initial seven-month project period was extended to nine months in order to accommodate the need for McDonald's HR employees to do their usual work in addition to assisting with the migration of data into the new system and attending training sessions.

What SAP HCM did for McDonald's

For the first time, McDonald's is able to do leave provisioning. Employee relations and training have moved into a different league.

In addition to the scalability the system has given McDonald's in terms of fundamentals such as payroll, financials, and controlling, the company now has insight into and capabilities for real-time best practice management of disciplines such as employment equity, and organisational, position, talent, time, and leave management across the entire, very diverse spectrum of its employees.

For the first time, the company is able to do leave provisioning – and employee relations and training have moved into a different league.

All aspects of human capital management automated for 200 sites and 8 000 employees countrywide
