

# Respond smarter and faster with hybrid cloud.

**If you believe you can do anything,**  
we're here to help you do it.

## You have **ambition**

### Grow

Serve customers better, on-demand. Increase value of customer contacts. Extend into new markets.

### Acceleration

Reduce time-to-market. Respond quickly to events. Make smarter decisions faster.

### Transform

Digital transformation. Supply chain efficiency. Lean manufacturing. Optimise processes.

### Innovative

Find smart solutions to challenges. Launch fast or fail fast and move on.

### Protect

Safeguard data. Protect reputation. Ensure availability. Manage risk. Fend off disruptors.

## We can help you **achieve your ambitions**

### Agile innovation

To test and experiment more quickly

### Customer loyalty

Better customer service in more flexible way

### Business insight

Real time data to transform your business

### Employee engagement

Help employees be more productive anywhere, anytime

### Process efficiency

Your ERP or core business systems performing better and more cost effectively

### Minimised risk

Secure your business from threats

by putting cloud at the core of your business

## Meet some of **our clients**

We helped **Fujifilm** innovate for their customers with a **cloud based** picture platform.

We're helping **A.S.O.** transform race data from the Tour de France into a revolutionary spectator experience with a cloud analytics platform.

We gave world leaders secure communications at the **G20 Summit** with a cloud desktop for just as long as they needed.

We helped one of the world's **largest hospitality companies** keep their guests coming back with **cloud-based customer service**.

We helped an African mining company **streamline** their business processes by moving their **SAP to the cloud**.

## Our cloud technology to **accelerate your ambition**

We can cover every possible permutation of **private** and **public cloud**. In your **data centre**, ours, or both. Including **managed on-site** and hosted IT, and third-party **cloud services**. And integrate it all into a **unified eco-system**.

## We can **help you** along with

**Consulting** and **professional services** to assess, plan, migrate, and govern your cloud.

We'll keep you in command with **CloudControl™**.

And if you like, we can do everything for you on our **Managed Cloud Platform**.

## For an **integrated solution**

We'll surround your cloud with all the enabling technologies

**Data Centres**

**Networking**

**Security**

**Support Services**

**Managed Services**

**Outsourcing**

So if you believe you can do anything, we're here to help you do it
