

Dimension Data and Check Point

With best in class technology and expert skills to make it happen

Modern businesses rely on **internet communications**; yet ensuring that your security is not compromised and critical data is secure and available, remains a challenge. **Dimension Data and Check Point** have been **working together** for over a decade to **assist organisations** to overcome these issues.

A compelling and complementary value proposition

Dimension Data's integration, support and operational expertise, combined with Check Point's advanced technology, from firewalls to innovative software blade offerings, result in customised and comprehensive services for organisations looking to improve their overall security posture.

Challenges we help you address

How do I:

- Remain comfortable with my level of perimeter defence?
- Protect internal business unit data?
- Allow clients and partners secure access to my internal systems?
- Ensure that my systems are not at risk from internal attacks?

Dimension Data is one of only four Global Gold Partners in Check Point's Pure Advantage channel programme and can also offer services on a managed service and subscription basis.

system integrator	vendor
Dimension Data's strengths	Check Point strengths
Dimension Data's heritage in IP networks spans more than 25 years and we have over 20 years' experience in security. 78% of the Global Fortune 100 and 59% of the Global Fortune 500 are Dimension Data clients	Check Point was founded in 1993 and employs over 2,200 people worldwide. 100% of Fortune 100 companies and 98% of Fortune 500 companies use Check Point security solutions
