Cloud Migration Services

Achieve enterprise agility with our fast track to cloud

Seamless migration of every workload to the optimal platform, improving operational efficiency, scalability and agility.

Our end-to-end service for cloud migrations, begins with auditing your workloads for suitability for migration. We will then plan and manage the migration to the best-fit platform without any disruption to daily operations and business.

How we deliver

We support many migration types. Our unique approach is built on many years of experience and is designed to accelerate the migration process and mitigate risk. You will benefit from our tried and tested blueprints based on best practices, certified products and experience to accelerate the migration process and mitigate risk.

We will audit your current IT landscape to discover workloads and infrastructure eligible for migration. We will prepare a detailed migration plan for you, minimizing service disruptions and risks during the move. Then we'll migrate the workloads accordingly.

After the migration, we can manage the workloads and infrastructure for you, or leave that up to you.

| Business outcome | Benefits |
|---|--|
| Unified global service delivery model | Worldwide consistency in service delivery |
| More agile, scalable and flexible IT resources | Ability to react quickly to a changing business environment |
| Lower capital investments and operating costs | Match IT resource demands with requirements without incremental capital investment |
| Maintain security and meet compliance requirements | Mitigations of business risk |

The 6Rs we align our migration types to:

Rehost

Lift and shift

Replatform

Lift, shift and tweak

Refactor

Start with an assessment

A **Hybrid Migration Assessment** or a **Cloud Foundations Service** enables us to recommend your journey to a hybrid cloud. We'll recommend improvements to your current platform route to hybrid cloud and where to strategically position your workloads to support your business.

¹ NTT provides platform support and technical guidance for solution redesign. Software development is not included.

Key service features

| Service | Key features |
|--|---|
| Migration from any platform to any platform | <ul style="list-style-type: none"> • Platforms supported include VMware, Azure, AWS, GCP, Nutanix and others • Technologies supported include IaaS, PaaS, Serverless and others • Containerization supported includes, but isn't limited to: Google Kubernetes Engine (GKE), Azure Kubernetes Service (AKS), Amazon Elastic Container Service for Kubernetes (EKS), Amazon Elastic Container Service (ECS), AWS Fargate, and Docker on IaaS virtual machines |
| Tested blueprints | Tried and tested blueprints based on best practices, certified products and years of experience |
| Risk mitigation | We have over 15 years of expertise in managing migrations to any platform |
| Top cloud partnerships | Highest level of partnership with major cloud vendors |
| Our own IP tooling | We leverage our own IP (NTT's Discover®, NTT Núvol® and NTT ENZiME®) combined with leading commercial tools used by our highly qualified experts to deliver a quality and agile migration experience. |
| Managed Services Platform | Supports the migration process and management of hybrid infrastructures globally |
